- Summer 2023 — Sales assistant (multi-skilled employee) Monoprix, Antony, Shelf management and cashier duties
- 2018 — One-week internship in Paul Bakery, Antony, Sales and kitchen assistance

It Project

Bachelor of Technology (BUT) Computer Science – 3rd Year (2025–2026)

- Development of an **automatic playing card detection system** combining **computer vision, artificial intelligence, and video processing** to record and analyse bridge games upon client request.
- Technologies used: **Python, AI, video processing, HTML** for the interface and data presentation, plus a **database** to store all collected information.

Bachelor of Technology (BUT) Computer Science – 2nd Year (2024–2025)

- Design and development of a **2024 Olympic Games management application** in **Java**, including planning features, data management, and full **IT project management** work.
- Development of a **database-driven website** allowing users to vote on proposed laws, built using **PHP and HTML**, including data storage and user interaction management.

Bachelor of Technology (BUT) Computer Science – 1st Year (2023–2024)

- Design and configuration of a **mini-computer based on Raspberry Pi**, including system installation, configuration, and optimisation.
- Creation and management of a **database simulating customer interactions within a company**, including modelling, querying, and data exploitation using **SQL**.
- Development of a **website for a fictional school** using **HTML/CSS**, including interface design and content structuring.
